MULTI-AGENT REAL-TIME NETWORK THREAT DETECTION AND
AUTOMATED RESPONSE AGENT

ABSTARCT

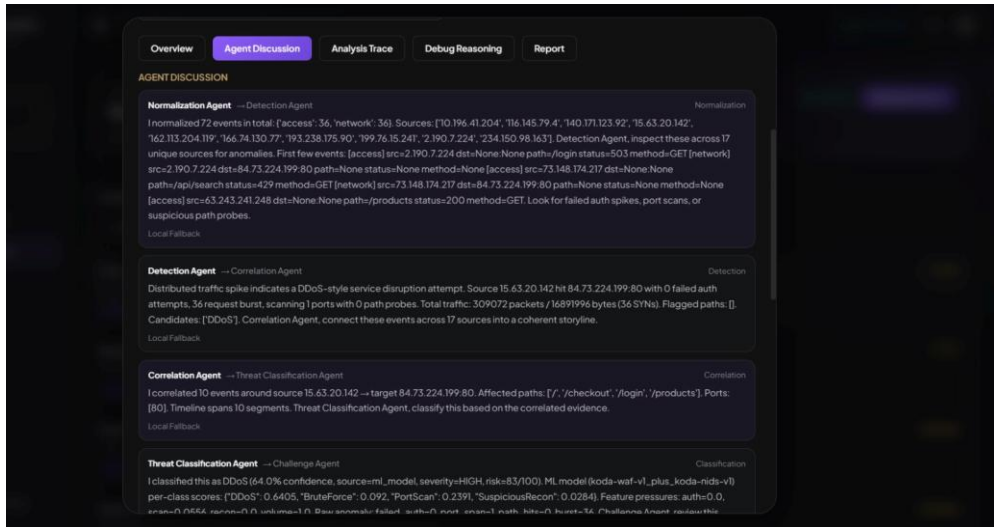

CyberAgent is a SOC automation platform for real-time threat detection using a multi-agent It integrates various telemetry data with intelligent models to detect and classify threats. The system ensures efficient investigation and automated response with human approval. It continuously monitors network activity to identify suspicious behavior. The platform improves response time and reduces manual effort in security operations. It enhances accuracy by correlating data from multiple sources.
