MINDMELD : AI AGENT BUILDER WEB APP

ABSTARCT

MindMeld: AI Agent Builder Web App converts natural language prompts into structured AI-agent workflows and previewable software outputs. Using a master-agent approach, it creates and validates workflows through DAGs, dependency checks, and topological sorting. Built with Next.js, React, TypeScript, AI SDKs, and sandbox environments, it supports code generation, workflow visualization, application previews, and iterative modifications for rapid AI-driven software development. **The platform simplifies AI application creation by transforming ideas into executable, transparent, and interactive software solutions.**
